COMPANY PROFILE

**WE BELIEVE IN
OUR CAPABILITIES
WE ALWAYS SEEK
TO DEVELOP**

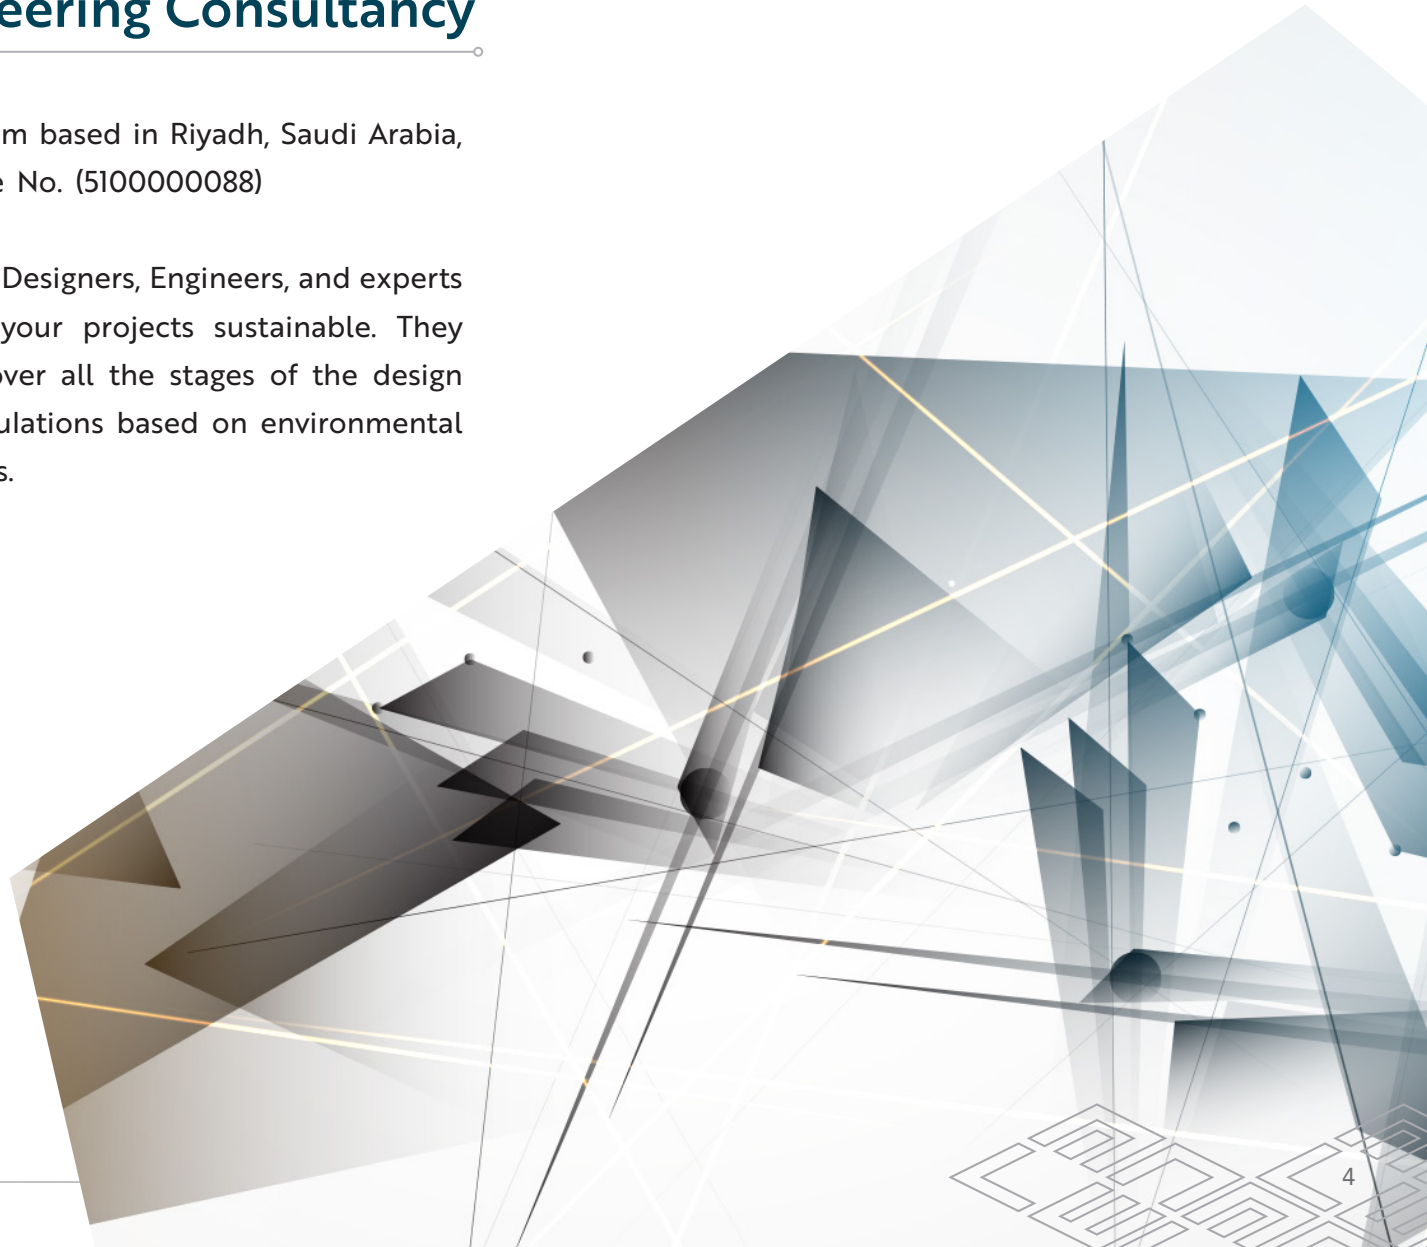

**ABOUT
COMPANY**

Gulf Links for Engineering Consultancy

GLEC is a consulting and design firm based in Riyadh, Saudi Arabia, Saudi Council of Engineers License No. (5100000088)

composed of a group of Architects, Designers, Engineers, and experts who provide solutions to make your projects sustainable. They integrate project teams to work over all the stages of the design process providing studies and simulations based on environmental and cost-effectiveness projections.

“ **GLEC provides architecture and designs** through implementing innovative ideas. The company services target **individuals, companies, and investors** who have visions of a successful professional environment, with a clear voice that helps them feel **confident and successful** ”

OUR VISION

Leadership in engineering consultancy and to fulfill **client wishes** to develop a **high-quality** engineering product at the lowest possible cost until **we become clients' first choice.**

WHAT
WE DO

GLEC offers a full range of comprehensive architectural, interior design, and planning services, from initial feasibility and programming studies through construction administration and building completion.

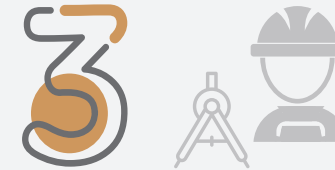

TELL ME MORE

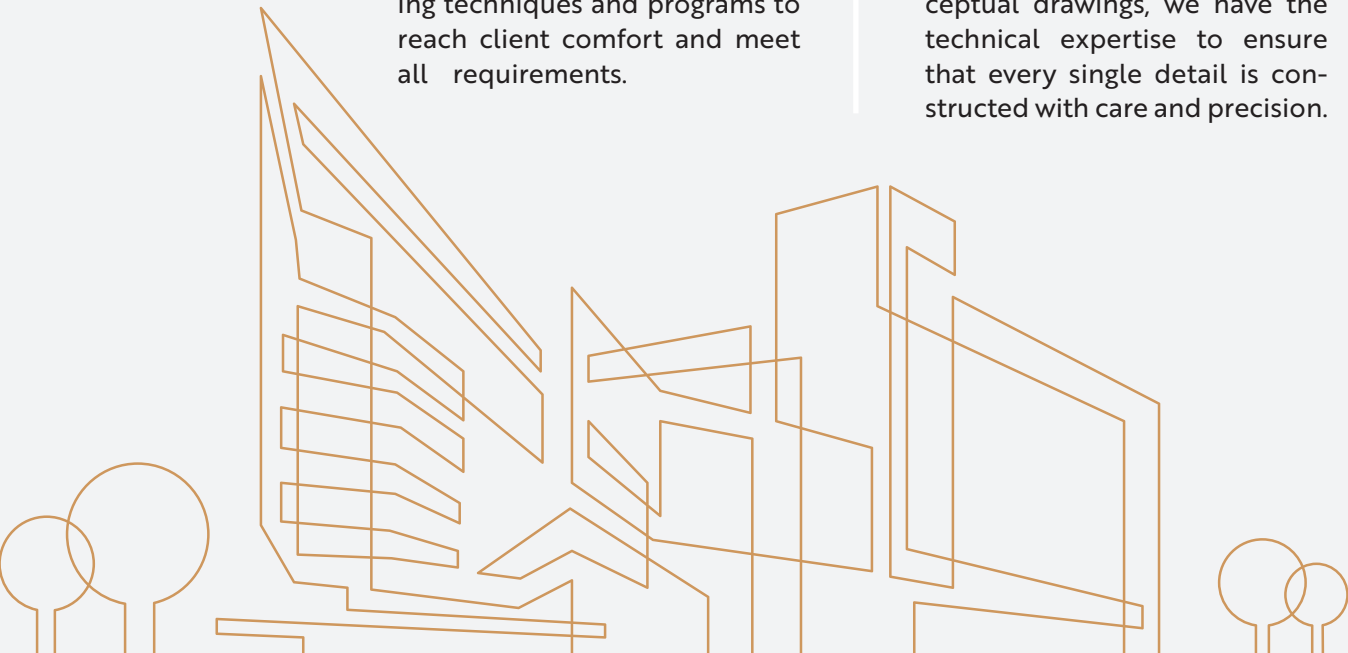

We believe in our capabilities and we always seek to develop our potential to provide creative and innovative solutions for each project. Taking into account the engineering and architectural foundations by using state-of-the-art engineering techniques and programs to reach client comfort and meet all requirements.

We are a local firm with a global experience. We have prided ourselves on continuing to push the boundaries of design, explore new technologies, learn better techniques, and work harder to reveal the strengths of every project. Beyond beautiful conceptual drawings, we have the technical expertise to ensure that every single detail is constructed with care and precision.

Our work has continued to develop and advance with contemporary design through a strong commitment to technology, education, and most importantly by employing a very talented group of architects and designers.

“ The **Architectural idea** is the mental image and the basic seed on which the project is built..

It is what makes a normal place a **special place** which we center on and make it different **from other designs** //

ARCHITECTURAL DESIGN

Dealing with data and ideas and turning them into a clear reality

- External Design
- Internal design
- Architectural planning/Layout

CONSTRUCTION DESIGN

Achieving design objectives and preserving the integrity and safety of the enterprise.

ELECTRICAL DESIGN

Study and distribution of lighting and its derivatives to achieve the highest beauty and comfort

PROJECT MANAGEMENT

Organization and management of human and material resources for the highest quality output of the project, and providing consultation and engineering and technical studies for the projects.

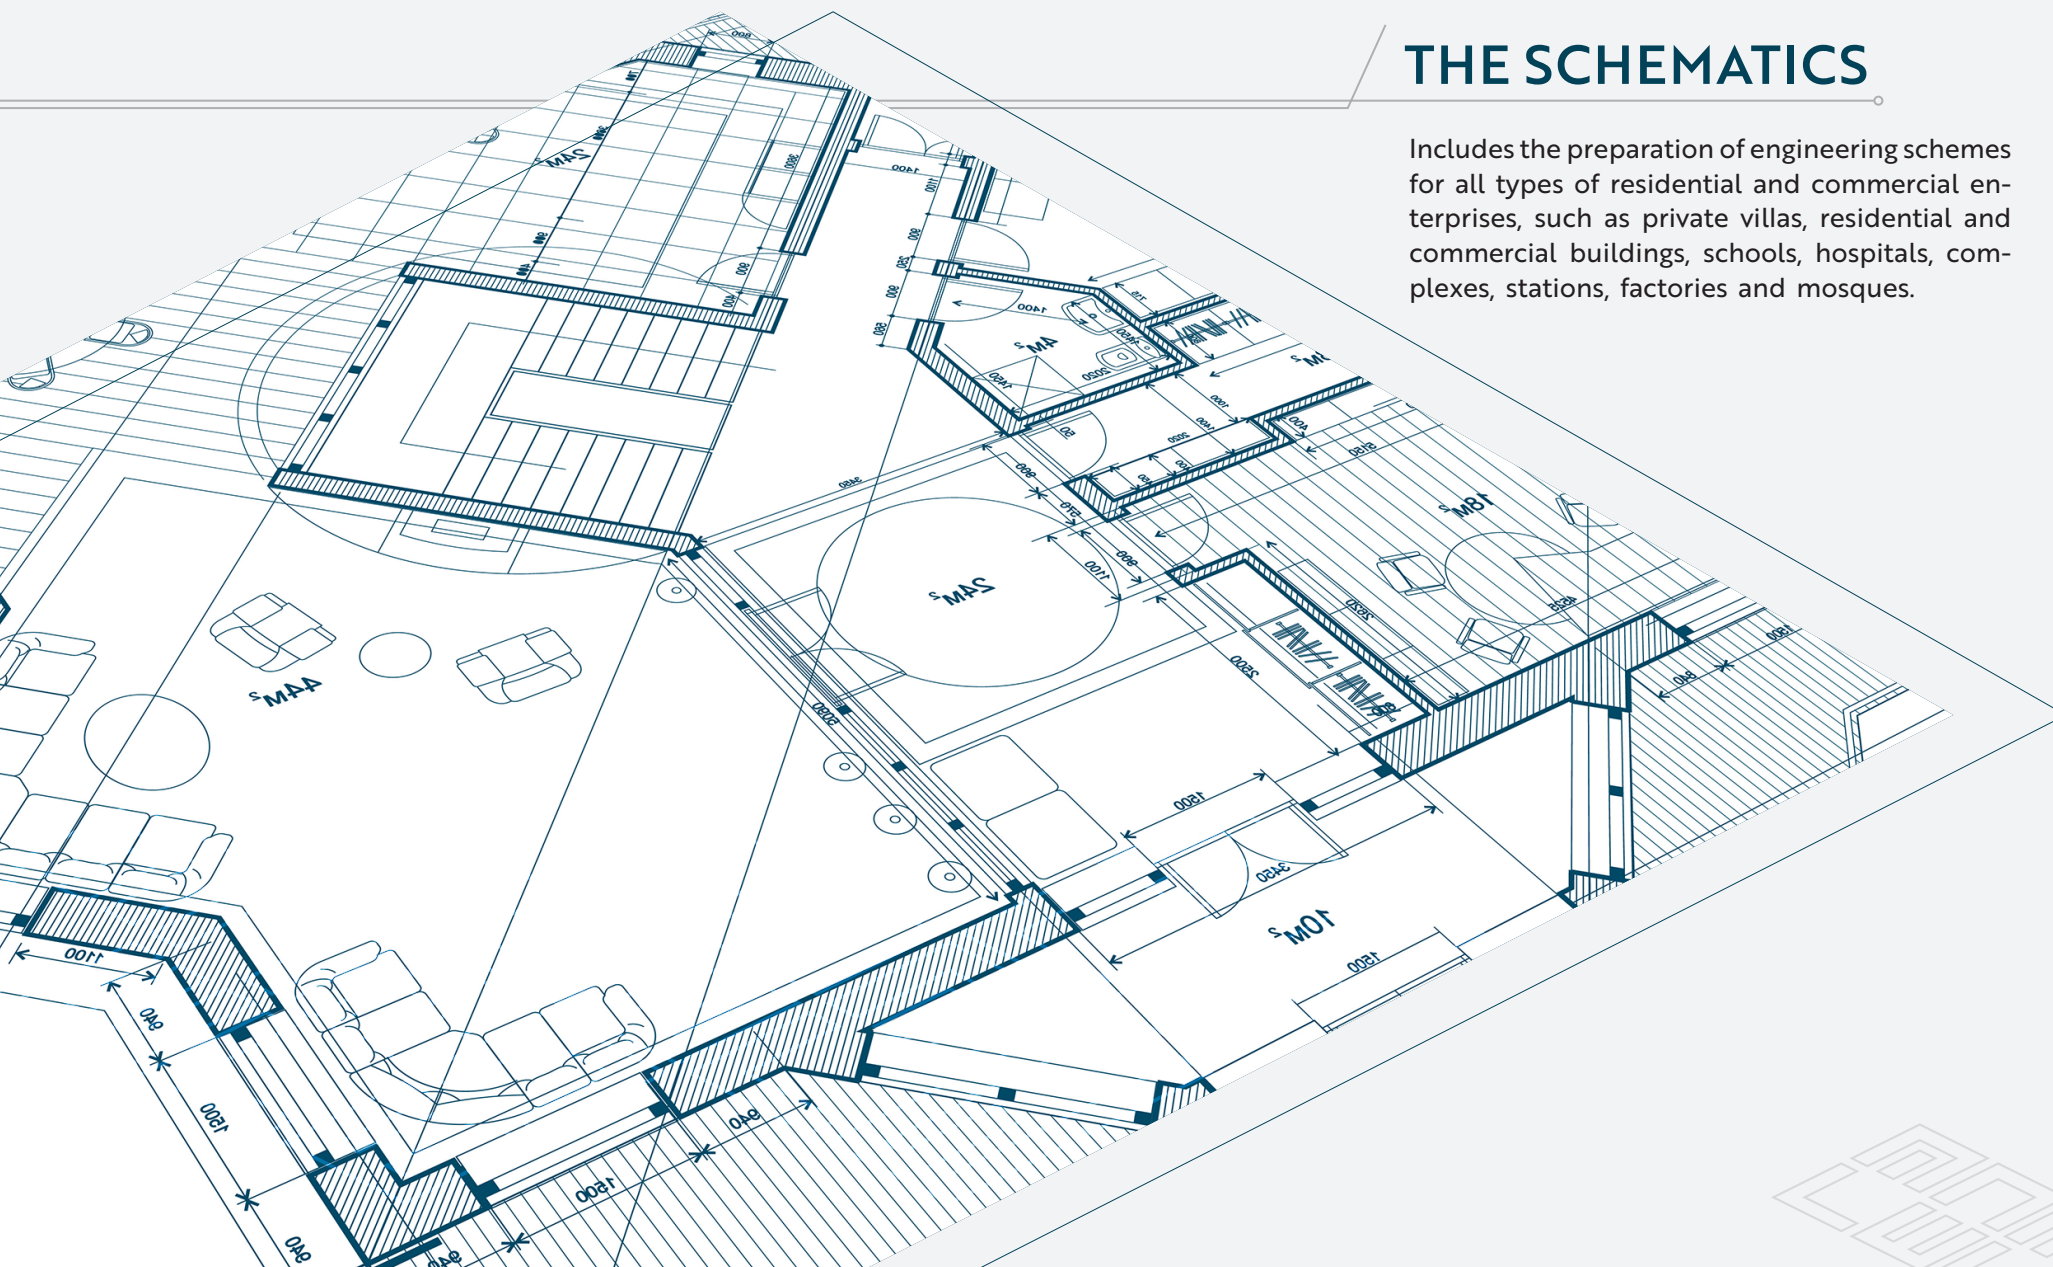

CADASTRAL SURVEY

Measuring and monitoring measurements, geographical terrain, cadastral reporting, staging and screening of housing units using state-of-the-art cadastral equipment.

THE SCHEMATICS

Includes the preparation of engineering schemes for all types of residential and commercial enterprises, such as private villas, residential and commercial buildings, schools, hospitals, complexes, stations, factories and mosques.

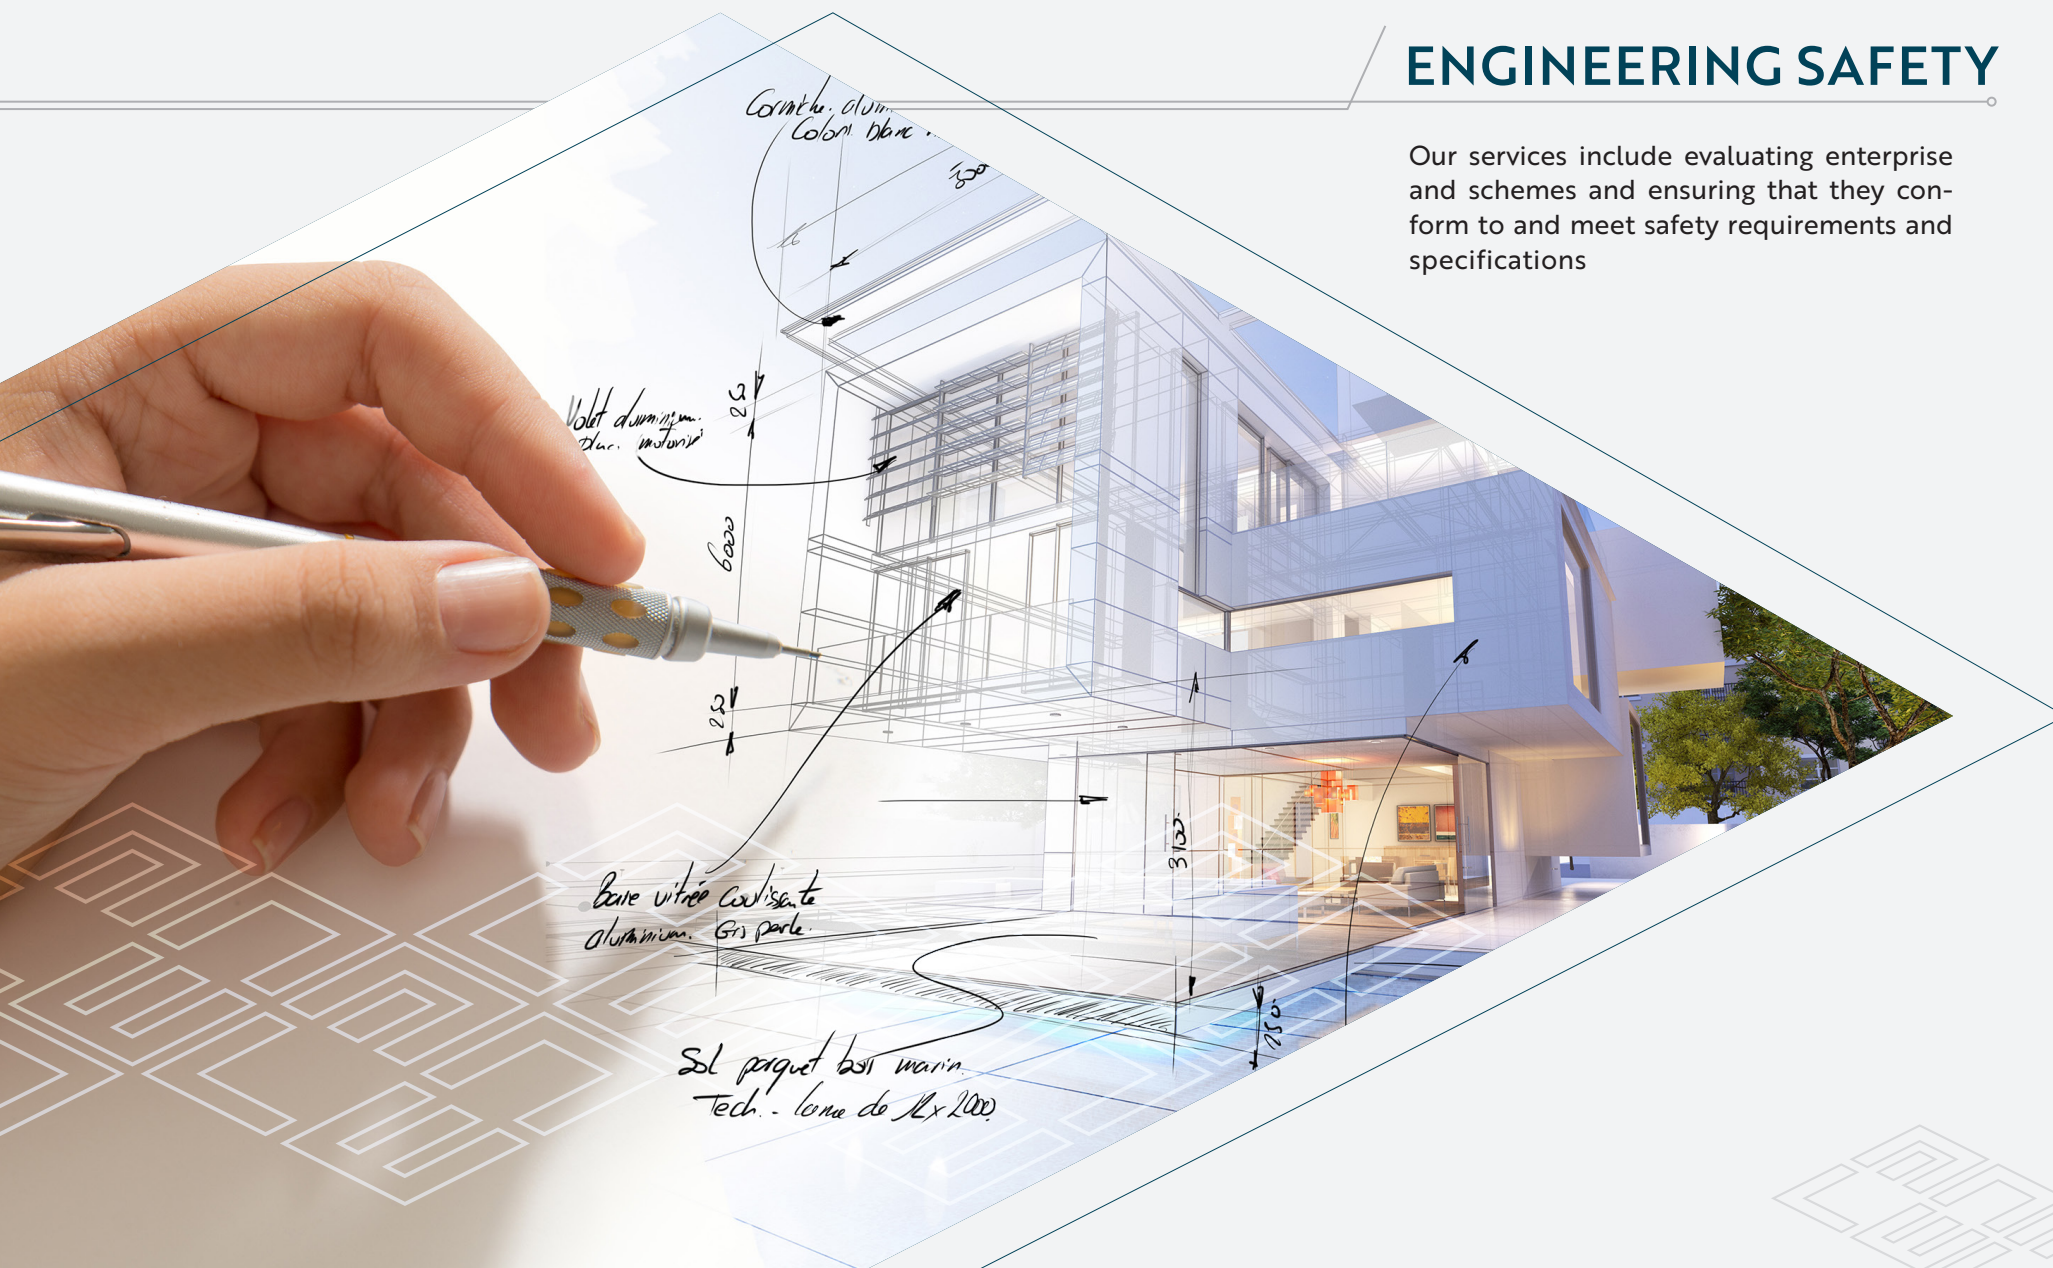

SUPERVISION

Supervision over the implementation work through technical visits and verification of compliance with approved requirements, technical specifications and plans

ENGINEERING SAFETY

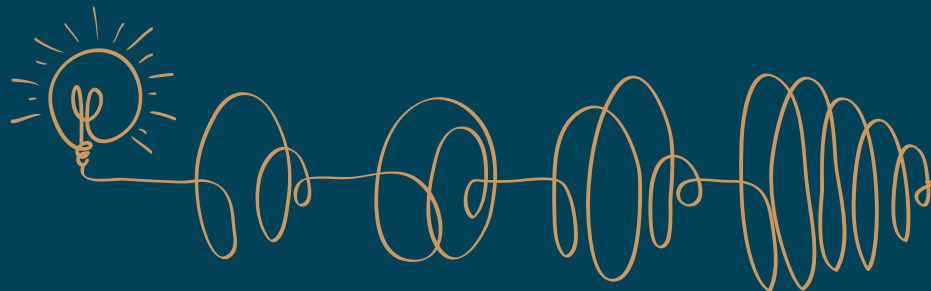

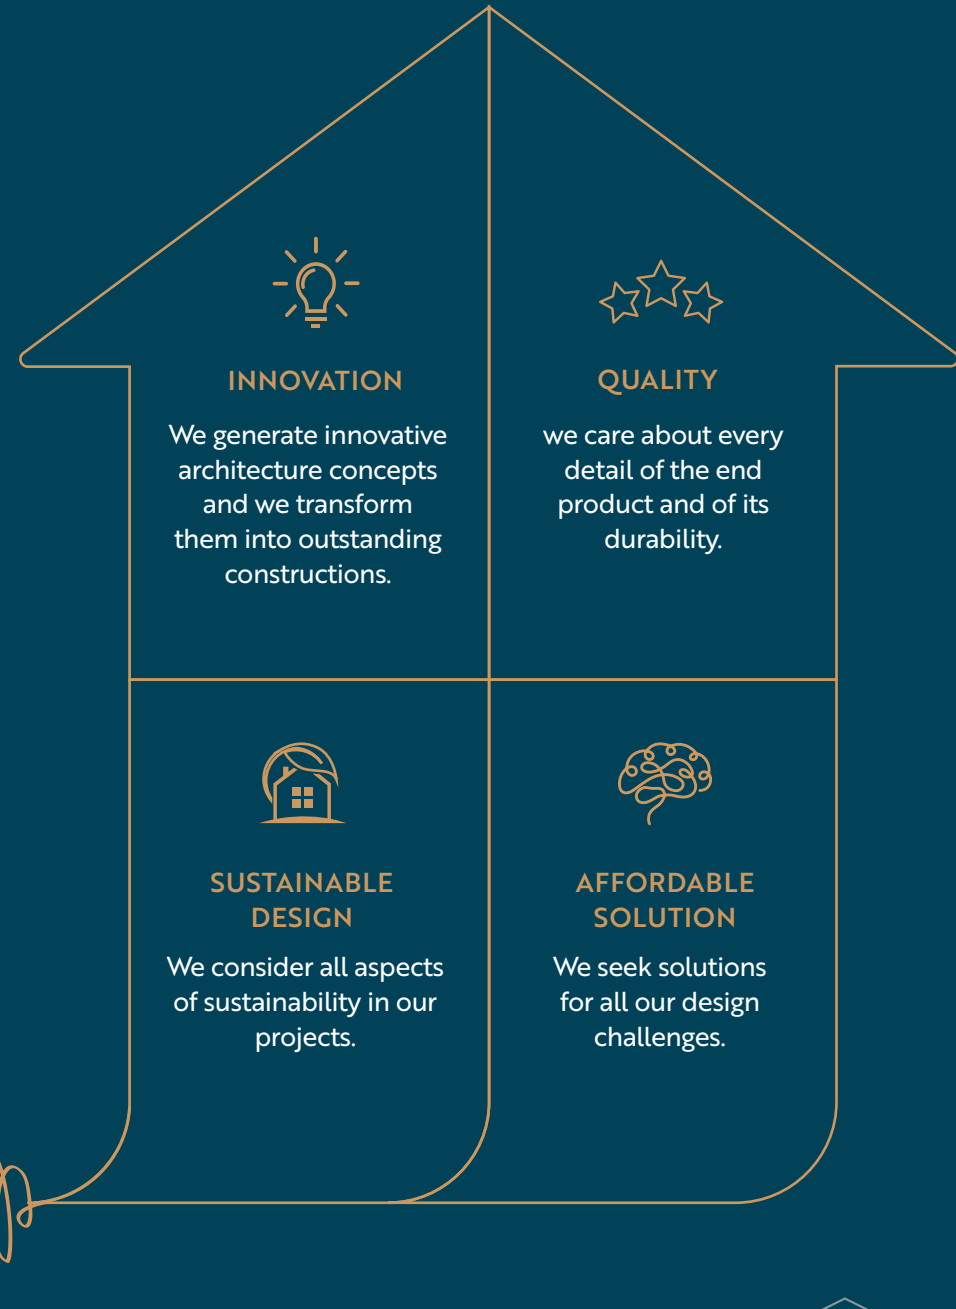

Our services include evaluating enterprise and schemes and ensuring that they conform to and meet safety requirements and specifications

WHY US

At **GLEC**, we are distinguished by our exceptional ability to understand and apply the needs of our clients on the spot implantation thereof. From design to supervision and execution, we are completing every project to the fullest and best possible satisfaction of our clients.

- Engineer Efficiency
- Knowledge of client needs
- Market knowledge
